

Junior IT Administrator

Anubex is a Belgian ICT company and technology visionary active in cross-platform migrations of large mission-critical software applications. Anubex specializes in the creation of migration and testing tools that automate the conversion or re-hosting of software applications on a variety of "legacy" platforms to open systems or mainframes. Anubex also provides migration services to its customers during migration projects and supports a growing international network of partners that accommodate their own customers with the help of our technology solutions and expertise.

To strengthen our team in Kontich (near Antwerp), we are currently looking for an enthusiastic Junior IT administrator.

Responsibilities:

Your responsibility will be the ongoing maintenance of our IT infrastructure, which consists of a virtualized platform running a mix of Linux and Windows servers.

You will operate within a team of 2 experienced IT staff.

Job profile:

Must have:

- Good knowledge of Linux;
- English communication skills;
- An open mind to learn and work with different technologies;

Nice to have:

- Knowledge of a scripting language;
- Knowledge of automation tools;
- Knowledge of networking infrastructure;
- Knowledge of DevOps tools;
- A degree in information technology/computer science;
- A first professional experience;

What we offer:

- A positive atmosphere in an international company with a growing partner ecosystem;
- A dynamic team with lots of passion and experience in a vast array of different technologies and languages;
- A high degree of flexibility including flexible hours, home office, extra leave, career planning;
- A competitive salary completed by additional benefits such as group insurance, medical insurance, meal vouchers, laptop.
